

Beauty of the music across the East and the West

Educational Programs

Education of young people is also important to WaFoo. In June 2005, thanks to the support from COAHSI and SI Bank & Trust Foundation GAINS (Growing Arts in Neighborhood Schools), we gave classes on the music of West and West for its 1,200 students at PS22. The young audience was very excited. We will continue the program so that more and more people, both in America and Japan, understand each other through the music from two different cultures.
